

model	object[]	True		Model info list, model number at most 100 characters.
tier_index	int32[]	True	[0]	Tier index of this model. If you want to update one tier/two tier to no tier, can just pass the tier_variation and standardise_tier_variation as [], and pass the model >> tier_index as [], meanwhile pass the original_price, seller_stock, etc., to set the price and stock for the modified product with no tier structure.
original_price	float	True	38.3	Original price of this model. For CO local VAT responsible seller: Please remember the price you set in here must be VAT inclusive. If you have any doubts on how to calculate VAT for your product please refer to the Seller Education Hub (https://seller.shopee.com.co/edu/article/13565)
model_sku	string	False	SKU	Seller SKU of this model, model_sku length information needs to be no more than 100 characters.
seller_stock	object[]	True		new stock info (Please notice that stock(including Seller Stock and Shopee Stock) should be larger than or equal to real-time reserved stock)
location_id	string	False		location id, you can get the location id from v2.shop.get_warehouse_detail api, if seller don't have any warehouse, you don't need to upload this field.
stock	int32	True		stock
gtin_code	string	False		- GTIN is an identifier for trade items, developed by the international organization GS1. - They have 8 to 14 digits. The most common are UPC, EAN, JAN and ISBN. - GTIN will help boost positioning in online marketing channels like Google and Facebook. - That incorporation with GTIN will also aid in Search and Recommendation in Shopee itself allowing buyers to have higher likelihood of finding one's listing. Note: If you want to set "Item without GTIN", please pass the gtin_code as "00". The validation rule is based on the value return in gtin_validation_rule" field in v2.product.get_item_limit API - Mandatory: This field is required and must contain a correctly formatted GTIN number. - Flexible: This field is required and must contain either a correctly formatted GTIN number or "00" to declare that the item/model has no valid GTIN. - Optional: This field is optional and can contain a correctly formatted GTIN number, "00" or be omitted entirely.
weight	float	False	1.1	The weight of this model, the unit is KG. If don't set the weight of this model, will use the weight of item by default.
Name	Type	Required	Sample	Description

dimension	object	False		The dimension of this model. If don't set the dimension of this model, will use the dimension of item by default.
package_height	int32	True	11	The height of package for this model, the unit is CM.
package_length	int32	True	11	The length of package for this model, the unit is CM.
package_width	int32	True	11	The width of package for this model, the unit is CM.
pre_order	object	False		Pre-order information of this model. Notes: If don't set the DTS of this model, will use the DTS of the item by default.
is_pre_order	boolean	True	false	Whether the model is pre order.
days_to_ship	int32	False	2	Days to ship. Please get the days_to_ship range from the get_dts_limit API.
standardise_tier_variation	object[]	False		There is at least one standardise_tier_variation and tier_variation. If you want to update one tier/two tier to no tier, can just pass the tier_variation and standardise_tier_variation as [], and pass the model >> tier_index as [], meanwhile pass the original_price, seller_stock, etc., to set the price and stock for the modified product with no tier structure.
variation_id	int32	True	1	standardise tier variation ID.
variation_name	string	False	name1	standardise tier variation name
variation_group_id	int32	False	2	standardise tier variation group ID
variation_option_list	object[]	True		standardise tier variation option list
variation_option_id	int32	False		standardise tier variation option ID.
variation_option_name	string	False	option2	standardise tier variation option value
image_id	string	False	82becb4830bd2ee90ad6acf8a9dc26d7	standardise tier variation option image ID
